## Industrial Furnace

### Reheating Furnace

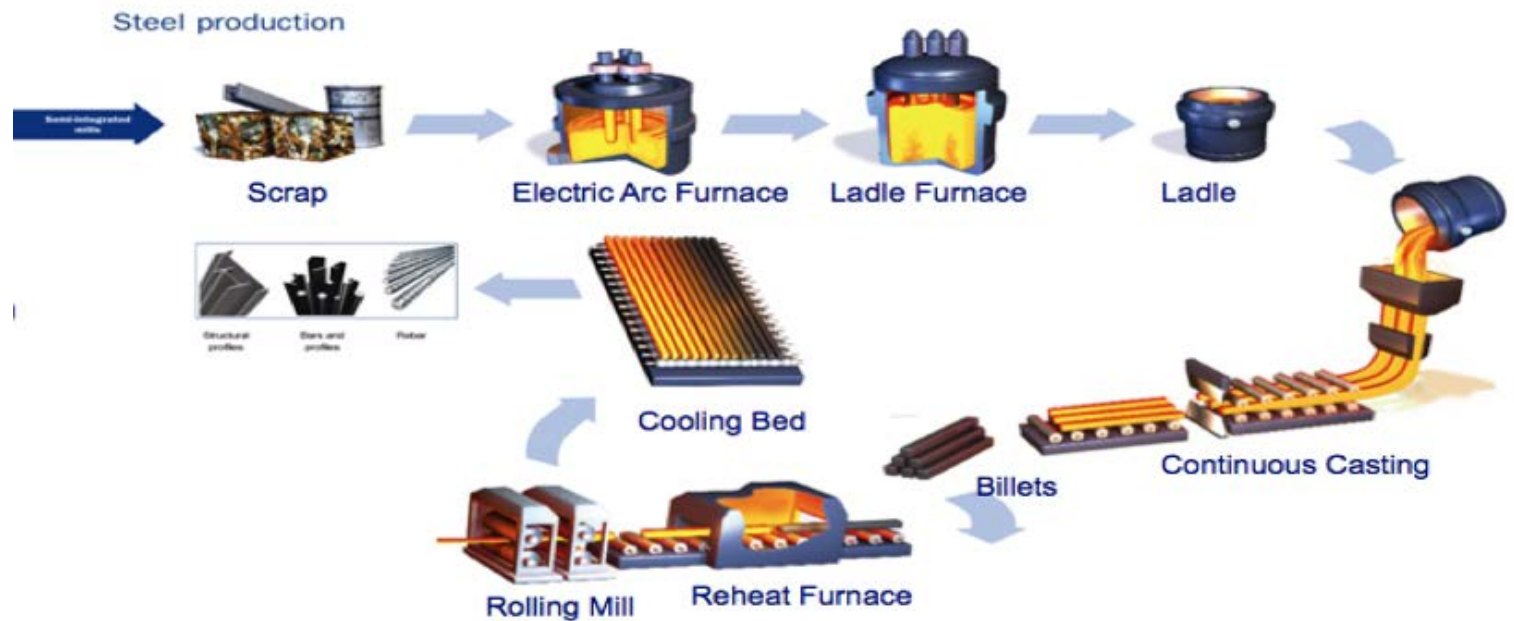

## Products Details

As a professional China reheating furnace manufacturer and equipped with a famous factory and plant, as well as providing with reheating furnace for sale, welcome to check the process and layout with Hani New Energy and Technology.

### Reheating furnace / Pusher & WBF

#### The function of reheating Furnace:

Heating Furnace is mainly used for heating the billets in rolling mill line. Usually the fuel of the furnace is gaseous fuel, natural gas, heavy oil or pulverized coal, some burning lump coal etc. . We have different types of furnace, such as pusher furnace, WBF(walking beam furnace) etc.

### Advantage of the reheating furnace:

- ◆ Easily control the temperature, uniform heating
- ◆ Small burning loss, flexible delivery
- ◆ High automatic degree that assures quality and enables production in semi-automatic and automatic machine.
- ◆ Length of furnace is not restricted, high output.

### Product application :
